

## Energy Efficiency Program for Business

# New construction bonus

### For a limited time only

In an effort to encourage new construction and growth throughout our service territory, we are offering a bonus on our new construction electric incentives. This bonus is intended to encourage the incorporation of energy efficient equipment and infrastructure into the design and is paid directly to the contractor, designer, or architect that submits the application.

This bonus will offer 10% of the value of incentives for new buildings or major renovation, paid directly to the contractor/designer/architecture/real estate firm. This bonus program will run from Jan. 1, 2022 to Nov. 30, 2022, and applies to all paid new construction (LEED and systems approach) electric measures. This bonus does not apply to new construction projects submitted before Jan. 1, 2022.

This bonus may be combined with other DTE Energy Efficiency Program for Business bonuses. However, incentives are calculated from the paid base incentive total, which does not include eligible bonuses. Funds are limited and subject to change. This offer may end at any time. **Only submissions through the Online Application are eligible for this bonus.**

**For more information about this offer, contact our office by phone at 866.796.0512 (option 3) or by email at [DTESaveEnergy@dnv.com](mailto:DTESaveEnergy@dnv.com).**

### How to apply:

Within your online application, go to the Finalize Tab. Near the bottom of the page in the Notes for DTE Energy Staff text box, type in "New Construction Bonus" before submitting your application. This bonus will be processed manually.
