

Project Snapshot: Roosevelt Estates

Taking strides to enhance the living experience for residents and save energy, the Roosevelt Estates community leveraged the benefits of the APS Multifamily Energy Efficiency program. The community took part in a free energy assessment, received free in-unit equipment and earned rebates for upgrading to LED lighting in common areas.

“We chose energy-efficient equipment because it saves energy and we were able to get rebates,” says Roosevelt Estates Maintenance Manager Alfredo Aparicio.

Energy-saving projects resulted in:

- \$25,000 in rebates
- 169,000 kWh in energy savings

Energy reduction results equate to more than:

- 1.8 million pounds of carbon eliminated
- 1,700 trees planted
- 473,000 gallons of water saved

Saving energy at your community starts here

Outdated and less efficient equipment can result in higher energy usage and maintenance costs. With the APS Multifamily Energy Efficiency program, your community can take advantage of free energy assessments, energy-saving products for your residents and rebates for equipment upgrades.

Get started today

- View available rebates for your community and submit rebate applications at apsapplynow.com.
- Find out if your community qualifies for a free energy assessment at meepcheckup.com.

Connect with our team

- Work directly with our team to identify opportunities to save energy, earn rebates for qualifying projects and submit rebate applications.
