

Advanced Rooftop Control (ARC) pilot

When you operate your HVAC equipment using advanced rooftop controls, your facility can improve indoor air quality, help manage utility costs and reduce energy use. APS Solutions for Business makes it easy with enhanced rebates offered by the ARC pilot.

The ARC pilot is open to all K-12 schools and select nonprofit facilities that provide emergency services and house the needy and homeless.

Save energy and money with ARC

APS Solutions for Business just made saving energy and money easier. Our ARC pilot gives eligible K-12 schools and select nonprofits a rebate when you install eligible HVAC equipment.

Available rebates

- Receive \$300/ton for retrofitting rooftop units with advanced controls and a new variable speed drive.
- Earn \$75/ton when adding new outside air economizers with an ARC project.
- Receive \$0.25/sq ft when adding energy management systems/networked thermostats with an ARC project.

It's as easy as 1-2-3

- Select an APS Trade Ally or contractor specializing in ARC equipment.
- Review existing equipment for eligibility and submit a pre-application with the proposed upgrade.
- Have the equipment installed and submit the final application to receive your rebate.
