

# Project Snapshot: Arizona Western College

Pursuing a sustainable future, Arizona Western College built their new Matador Activity Center with energy-efficient equipment and received rebates from APS Solutions for Business. With this efficient lighting and HVAC equipment, the new center will provide students and faculty with an enhanced learning environment.

“The APS rebate program is a great opportunity to receive funds for selecting energy-efficient equipment. APS has streamlined the application process to make it very easy to apply,” says Steve Eckert, AWC Director of Facilities Management.

## **This energy-saving project resulted in:**

- \$9,300 in rebates
- 53,000 kWh in annual energy savings

## **Energy reduction results equate to more than:**

- 635,000 pounds of carbon eliminated
- 550 trees planted
- 161,000 gallons of water saved

## Building a sustainable future starts here

APS Solutions for Business offers support and rebates to help you integrate energy-efficient equipment into your renovation and new construction projects. Rebates are available for installing eligible equipment including refrigeration, lighting, HVAC and more.

### Get started today

- View available rebates for your new construction project and submit rebate applications at [apsapplynow.com](https://apsapplynow.com).

### Connect with our team

- Work with our team to identify opportunities to save energy, earn rebates for qualifying projects and submit rebate applications.
- Scan the QR code or call (866) 277-5605 to get started today.
