Prescriptive Energy Efficiency Incentives

These incentives are available for implementing energy efficiency measures, such as installing new high-efficiency equipment or retrofitting existing equipment to improve energy efficiency, in categories such as Lighting/Electrical, Mechanical, Refrigeration and Building Envelope. Incentives are paid based on quantity, size, and/or the efficiency of the equipment. Incentives are provided for qualified equipment commonly installed in a retrofit or equipment replacement project. Full details of the requirements for each incentive measure listed in this Guide are included in the Incentive Catalog.

Custom Energy Efficiency Incentives

Apply Today!

The custom energy efficiency incentive program can help you lower your cost of operation by providing you with an incentive for installing a wide variety of equipment or implementing process improvements that result in a reduction of your electric and/or natural gas use. The more energy you save, the more your company can earn in incentives.

You'll receive \$12 per Mcf of natural gas saved and \$0.10 per kWh of electricity saved subject to the incentive caps and limits specified above. The payback period must be between one and 15 years and the incentive is capped at 50% of the total project cost for each project.

Examples of custom projects include, but are not limited to:

- Process (non-HVAC) improvements (productivity increase).
- Process (non-HVAC) waste heat recovery.
- Constant volume to variable volume water system conversion.
- Variable Speed or Variable Frequency control (VSD/VFD) of large motors (> 250 HP).
- Refrigeration compressor upgrades.
- Complex compressed air equipment or system improvements.
- Tank insulation.
- Injection molding machine DC to AC drive conversion.
- Variable speed or variable frequency drives (VSDs/VFDs) on hydraulic equipment.

Retrofit Project

Projects such as replacing existing equipment with new high-efficiency equipment, or retrofitting existing equipment to improve energy efficiency.

New Construction Project

Projects that result in a permanent reduction in electrical (kWh) and/or natural gas (Mcf) energy use compared to baseline practices. The following project types are classified as New Construction/Major Renovation:

- New building wherein no structure or site footprint presently exists.
- Addition or expansion of an existing building or site footprint.
- Major tenant improvements that change the use of the space.
- Projects that require added energy load.

Buy Michigan Bonus

Customers who use Michigan made products in their energy saving projects may be eligible for an additional 20% bonus incentive. An affidavit from the manufacturer attesting the product is at least 50% manufactured and assembled in the state of Michigan (exclusive of packaging) is required.

Business Instant Discount Program

Instant savings, no application required! Simply purchase the products from participating distributors to receive the instant discount. The incentive is a discount at the point of purchase from participating distributors.

For full details, visit ConsumersEnergy.com/instantdiscount.

Incentive Caps and Limits

The amount of incentives a facility or customer can receive is limited. A facility is defined as a single customer who is responsible for paying the Consumers Energy electricity and/or natural gas bill. A customer is defined as the organization under which the company (or companies) are owned or operated, regardless of who is responsible for paying the bill. Program year incentive limits are per customer, facility, project or measure per below.

Prescriptive Incentives:	100% of the total project cost, and per measure, facility, or project where specified in the Incentive Catalog or Application
Custom Incentives:	50% of the total project cost
Electric Customer Incentive Limit:	\$2 million across all facilities per customer
Natural Gas Customer Incentive Limit:	\$1 million across all facilities per customer
Natural Gas Custom Tiers per Customer:	100% of the NG incentive up to \$500,000 50% of the NG incentive above \$500,000
