

About our program

DTE Energy business customers – small, medium and large – can lower their monthly utility costs by implementing a few simple energy efficiency measures. Our Energy Efficiency Program for Business offers a comprehensive set of incentives for both natural gas and electric users designed to help you invest in energy efficient technologies.

Here are three ways to save:

Prescriptive

Are you replacing heating systems with newer energy-efficient models? Upgrading your hot water equipment? Check out the prescriptive incentives section of our catalog and application – and see our list inside. Prescriptive incentives cover a wide variety of energy-efficient improvements, including: HVAC, controls, refrigeration, lighting and more. Incentives are based on quantity, size and efficiency of the equipment.

- Prescriptive incentives are available for many common energy efficiency measures.
- Incentives are based on predetermined energy savings.
- Prescriptive incentives typically average 20% to 50% of the incremental cost of the equipment or services provided.

Custom

Can't find your project in the prescriptive incentive section? Then consider applying for custom incentives, which are for projects that involve less common or more complex technologies than our list of prescriptive equipment. Custom incentives are based on the first year of energy savings (Mcf).

- Custom incentives are offered for capital investment projects that are not eligible for a prescriptive incentive.
- Incentives are determined on a case-by-case basis and are paid per unit energy saved.
- Custom incentives are capped at 50% of project costs.

New construction

Are you building a new facility, changing the usage of space or adding load? Then our new construction and major renovation incentives are available to assist you:

- Systems approach incentives are predetermined to optimize the energy efficiency of individual systems.
- LEED whole building approach incentives are based on energy savings validated by LEED.
- The LEED design review assistance incentive is designed to encourage LEED certification.
- New construction/major renovation incentives are available for new facilities, the renovation of existing facilities or a change of use project, such as converting a warehouse into an office complex.
- Incentives also are available for adding load.

Energy Efficiency Program for Business

2023 Prescriptive gas measures

DTE Energy offers cash incentives for the installation of these energy-saving measures*

HVAC

- ✘ Automatic high speed doors – exterior doors
- ✘ Boiler linkageless controls and O² trim controls
- ✘ Boiler modulating burner control
- ✘ Boiler stack economizer
- ✘ Boiler water reset control
- ✘ DDS/MZS to VAV
- ✘ Demand controlled ventilation/HVAC occupancy sensor
- ✘ Destratification fans
- ✘ Direct fired make-up air units
- ✘ Enhanced ventilation control
- ✘ High efficiency gas furnace/unit heater
- ✘ High efficiency space heating boiler
- ✘ Hotel guestroom energy management control (gas heat)
- ✘ HVAC boiler sequencing
- ✘ Infrared heaters
- ✘ Leaking steam trap repair or replacement
- ✘ Optimum start stop
- ✘ Original double hung windows with low U storm
- ✘ Outside air ventilation reduction
- ✘ Sensible energy recovery ventilation
- ✘ Steam trap monitoring system
- ✘ Total energy recovery ventilation
- ✘ Window reduction

Hot water and laundry

- ✘ Condenser heat recovery
- ✘ Gas storage water heater
- ✘ ENERGY STAR® high efficiency clothes washer (gas water heat)
- ✘ ENERGY STAR® instantaneous water heater
- ✘ High efficiency indirect domestic hot water system
- ✘ High efficiency pool heater
- ✘ Laminar flow restrictors
- ✘ Low-flow showerhead
- ✘ Low-flow sink aerator
- ✘ Mid efficiency indirect domestic hot water system
- ✘ Ozone laundry

Insulation

- ✘ Pipe wrap – steam or hot water boiler
- ✘ Pool covers
- ✘ Roof insulation (flat roofs and attic roofs)
- ✘ Truck loading dock leveler ramp air pit seals
- ✘ Truck loading dock seals
- ✘ Wall insulation

Process gas

- ✘ Air compressor exhaust heat recovery
- ✘ Furnace tube inserts
- ✘ High efficiency process boiler (water or steam)
- ✘ Modulated boiler control for process
- ✘ Optimized snow and ice melt controls
- ✘ Process boiler stack economizer
- ✘ Process boiler sequencing
- ✘ Regenerative/recuperative thermal oxidizer
- ✘ Steam trap monitoring system
- ✘ Tank insulation
- ✘ Night cover
- ✘ Refrigeration condenser waste heat recovery
- ✘ Reach-in refrigerated display case door retrofit

Boiler/furnace tune-up

- ✘ Domestic hot water boiler tune-up
- ✘ Forced air gas furnace or rooftop unit (RTU) tune-up
- ✘ Process boiler tune-up
- ✘ Process boiler tune-up (pool/spa)
- ✘ Process furnace/burner tune-ups
- ✘ Space heating boiler tune-up

What if I'm installing equipment that isn't listed?

If your project involves measures not listed here, you should consider applying for custom incentives.

Custom incentives are paid based on each project's first-year energy savings.

All custom applications require a reservation prior to beginning your project.

New construction and major renovation projects

If your project involves the construction of a new building or the repurposing of an existing structure, then you should apply for incentives under our new construction-major renovation program.

Incentives offered through this program are ideal for projects that either involve LEED certification or pre-determined measures. Look for the new construction icon in our catalog and [online application](#) – as well as the lists (left) – for help identifying qualifying measures.

✘ Qualifying measures for new construction projects
